AVer+ Installation for Mac

To install AVer+ Application:

1. Place the Installation CD into the CD-ROM drive. Double click the CD icon when appears. (Note = version no. may be different with updated version).

2. Go to Mac folder. Select and double-click **AVerVision 2.0.1.0001** and follow the on screen instruction.

3. Read the Software License Agreement and click **Continue**.

4. Click **Agree** to accept the agreement and continue the software installation or **Disagree** to cancel the software installation.

5. Choose the target volume to install the AVerVision application then click **Continue**.

6. Click **Install** to start installing the program.

7. When the installation is completed, click **Close**.
8. You may now use the AVerVision document camera with the AVerVision application or use it as a USB camera.

AVer+ Quick Guide for PC &

1. The floating panels on the screen are listed in the Window menu. You may select to enable/disable to show the floating panels in the list. To instantly hide/show all the floating panels, double-click either on the page area or gray area of the screen.

For Windows: In order to access the MENU bar and Control Panel, hover the mouse cursor to the top of the screen.

2. In the Toolbar, click the annotation features to draw lines, shapes, or type text and the Options panel will change depending on the selected item in the toolbar. In the Options panel, click on the sample template you want to use and then click and drag on the page area to make a line, shape or click to type text in the text box.

3. The lines, shapes and text will become an object. To change the attribute of the selected object or the sample template in the Options panel, click the object or sample template and click the tabs in the Property panel. To show the Property panel, click Window > Property Panel.
4. Use (move tool) to make a selection and click (select) in the Options Panel.
5. To rotate an object, select the object and click on the rotate handle (green circle) and drag in the direction you want to rotate it.
6. To resize the object, click one of the mini boxes around the border of an object and drag it downward or sideward.
7. To undo/redo the last action, click **Edit** in the menu bar and select **Undo** or **Redo**.

MAC

8. To display context-sensitive menu, select the object and right click on the object (Window) or click on the menu icon at the upper right corner of the object (MAC).
9. To display multiple pages on the screen, click on **Split Window** and click **Pin Page** to prevent the selected window from switching to other pages.

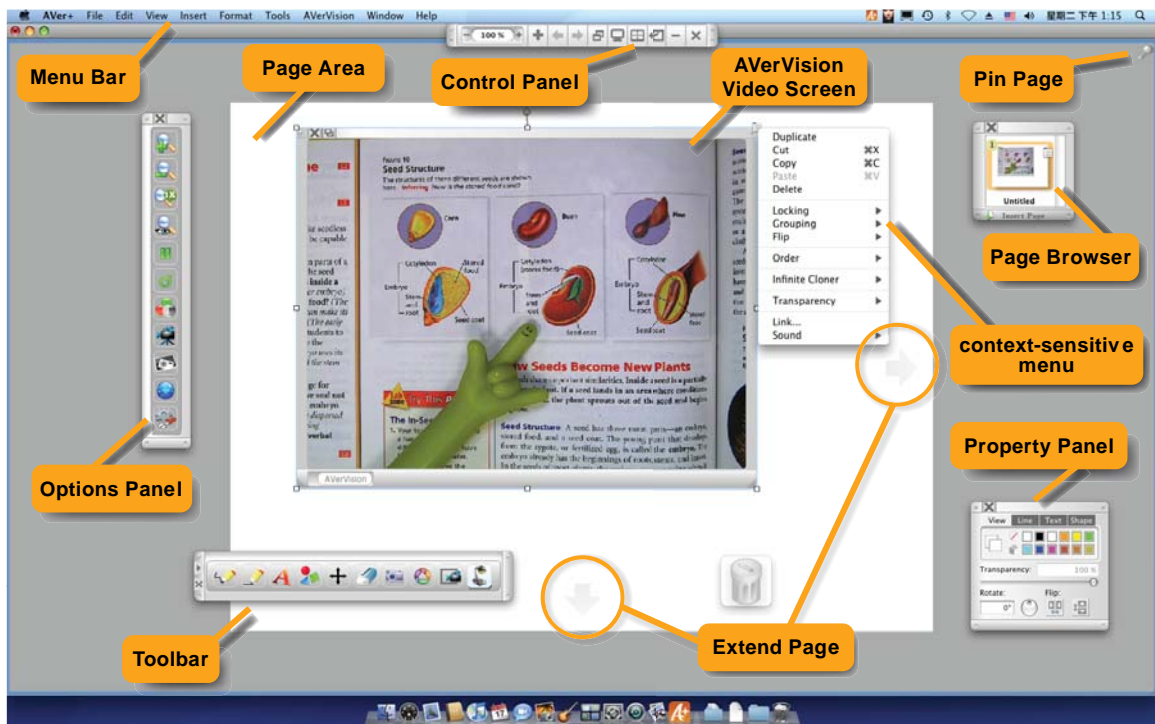

10. If the page area is not enough, you may extend the page to the right and downward. To extend the **Page Area**, click to extend sideward and to extend downward.
11. Use (capture) to take a picture of the AVer+ project screen and select the capture mode in Options Panel.
12. Use (record) to video capture the AVer+ project screen and save it in *.avi format (Windows) or *.mov format (MAC).
13. Use (special tools) to access the calculator, ruler and on-screen keyboard.
14. To annotate on top of any application (e.g., MS Office, internet browser, PDF, etc.), switch the AVer+ into Virtual transparency mode. This will make the page and gray area transparent.

In this mode, the camera and mouse buttons will appear at the upper right corner of the screen.

Enable (mouse mode) to assign the cursor task to other application and disable to AVer+. To capture the screen and insert it in the AVer+ page as background, click .

(AVer+ MAC Interface)
